30 OCT 1961

AUTHOR INDEX, VOLUME 16

Boatman, S. G. 166
Bolton, J. 178
Burkill, H. M. 1

Cook, A. S. 65

Gale, R. S. 38, 119

John, K. P. 173

Middleton, K. R. 139
Moir, G. F. J. and Tata, S. J. 155

Sekhar, B. C. 93

Tata, S. J. *see* Moir, G.F.J.

Watson, G. A. 126
Wycherley, P. R. 87, 99

SUBJECT INDEX, VOLUME 16

Titles of papers are given in italics.

A Comparison of Rock Phosphate and Superphosphate as Sources of Phosphorus for Seedling Rubber 139
Agelaea vestita 89
Ageratum conyzoides 90
Ammonia in latex preservation 66
Ammonia in smoked sheet preparation 71
Ammonium phosphate in latex preservation 66
An Apparatus for the Study of the Drying Rates of Sheet Rubber 119
Anticoagulants for latex 65
Apparatus for electrophoresis 156
A Survey of the Factors Involved in an Experimental Study of the Drying of Sheet Rubber 38
Axonopus compressus 88, 90, 91

Bactericides, in latex preservation 66
Bark :
- renewal 19, 185
- thickness
  - general comparison between clones and clonal seedlings 17
  - in fertiliser experiments 188
  - inland and coastal soils 19, 20
  - old clones 21
  - RRIM clones 22
  - virgin and renewed 19, 185

Bio-assay of growth substances in *Hevea* latex 166, 163
Blister formation:
- drying conditions 57
- elimination 58

Borax and latex preservation 66
'Bottom fraction' of fresh latex, isolation and extraction 156
Brown bast :
- effect of reduction of tapping intensity 17
- incidence on clonal seedlings 15
- incidence on RRIM clones 14
- site differences 12
- susceptibility of varieties 12, 35
- tapping system 13

Calcium :
content
cover crops 127, 136
Hevea 149, 188
fertilisers 139, 189
Calopogonium mucunoides, seed germination of 99, 100, 101
Centrifugation for isolation of 'bottom fraction' 156
Centrosema pubescens :
effect of fertilisers 126, 127, 128, 130
establishment 89, 92
seed germination 99, 100, 101
Chemical composition :
cover crops 126
Hevea 143, 149, 186
Christmas Island rock phosphate 140
Chromogenic (spray) reagents 169
Chromatograms, detection of growth substances 166
Chromatography of growth substances in *Hevea* latex 166
Clidemia hirta 88
Clonal seedlings :
Batu Kawan 33
growth compared with clones 10, 33
PBISG 'CDE' 33
Pilmoor 33
RRIES Fd 14 AB 33
RRIES Fd 18 33
RRIES Fd 18 N 33
RRIES Fd 22 33
RRIM 507 33
Sab 24 33
Tjir 1 33
yield in variety trials 20, 33
Clones :
BD 5 185
G1 1 33, 156, 162, 164
growth compared with seedlings 10
growth, in fertiliser experiments 183
Javanese 2
Lun N 33
Malayan 2

old 2, 13, 17, 21, 33
particle size of latices 94, 95
PB 86 33, 186, 187
Pil A44 156, 159, 163
Pil B84 29, 33, 186, 187
recommended for planting (1955) 20
Rub 393 33
RRIM 2, 8, 15, 33
RRIM 500 33
RRIM 500 series 32
RRIM 501 33, 156, 162
RRIM 502 33
RRIM 507 33
RRIM 508 33
RRIM 511 33
RRIM 513 33
RRIM 519 33
RRIM 520 33
RRIM 526 33
RRIM 527 33
Sab 24 33
Tjir 1 33, 140, 156, 158, 162, 164, 185, 186, 187
Tjir 16 33
yield in fertiliser experiments 184
yield in variety trials 20
Cover plants (*see also* under specific names):
effect on root disease 175
establishment 99
in fertiliser experiments 179
in variety trials of *Hevea* 5
germination 99
natural 99
nutrition 126
Cyperus compressus 92

Desmos dasymaschala 89
Detection and Estimation of Growth Substances in Hevea Latex 166
Dimensional changes in sheet rubber drying 41
Drying sheet rubber *see* Sheet rubber

Electropherograms 158, 159, 160, 161
Electrophoresis 156
Elettariopsis triloba 88
Equilibrium water content of sheet rubber 52
Estimation of the particle size of *Hevea* latex by the soap titration method 93
Eupatorium odoratum 91
Evaporation in sheet rubber drying 44

Fertilisers (*see also* Plant nutrients) :
- ammonium phosphate 180, 189
- ammonium sulphate 189
- application, discussion of 189
- application methods, broadcasting, mixing and pocketing 140, 145, 149, 152
- calcium 189
- chloride 180
- double superphosphate 180
- effect on cover crops 126
- effect on growth of *Hevea* 141, 182
- effect on girth increments 182
- effect on yield 183
- lime 139
- lime/molybdate 126
- magnesium 189
- nitrogen 181
- NPK 178
- phosphate 181
- potassium 180
- potassium chloride 189
- rock phosphate 139, 180, 189
- superphosphate 139, 180

Flemingia congesta Roxb., seed germination 99, 100, 101
Fomes lignosus Klotzsch 173, 174, 175
Fomes noxius Corner 173, 174
Formaldehyde in latex preservation 68, 77, 78, 80, 81
Formaldehyde in smoked sheet preparation 71

Fungi :
- *Fomes lignosus* 173
- *Fomes noxius* 173
- *Ganoderma pseudoferreum* 173
- root parasites 173

Germination of legume seeds 102
Gibrel in seed germination 103, 104
Girth :
clonal seedlings 9
effect of location 10
measurement 6, 141, 184
old clones 7
relationship to yield 184
RRIM clones 8
Gleichenia linearis (resam) 87
Glochidion sp. 88
Glycerine in seed germination 100, 101
Ground cover vegetation on rubber estates, review of 87
Growth of *Hevea :*
bark thickness 17
comparison of clones and seedlings 10
comparison on inland and coastal soils 10
girth 6, 141, 184
height 141
varietal comparisons 6
Growth regulators *see* Growth substances
Growth substances :
content of latices 171
detection and estimation in *Hevea* latex 166

Height of *Hevea* seedlings 141
Hevea brasiliensis Muell-Arg., large scale variety trials 1
Histogram of bio-assay activity 170
Hornstedtia sp. (a wild ginger) 90

IAA (3-indolylacetic acid) in *Hevea* latex 171
Imperata cylindrica (lalang) 87
Infra-red lamp irradiation in seed germination 103, 104, 105
Inland and coastal soils, comparison of *Hevea* growth 10
Interactions of Lime and Molybdate in the Nutrition of Centrosema Pubescens and Pueraria Phaseoloides 126

Kedah Series soil 179
Kerosene in seed germination 100, 101
Kinetin in seed germination 103, 104

Large Scale Variety Trials of Hevea brasiliensis Muell-Arg. on Malayan Estates 1934-53 1

Latex :

analysis, in measurement of response to fertilisers 188
particle size
clonal latices 95
effect of ammonia concentration 94
effect on mechanical stability 95
temperature effect on measurement 95
variation of 93
preservation
comparative tests of preservatives 65
experimental methods 66
short-term 65
preservatives
ammonia 66
ammonium phosphate 66
borax 66
formaldehyde 68
silicates 69
sodium benzoate 67
sodium carbonate 66
sodium citrate 67
sodium metabisulphate 67
sodium silicate 67
sodium sulphite 67
zinc sulphate 67

Leaf :

analysis 127, 149, 188
area 141

Limacia velutina 89

Lime, effect on response of *Hevea* to phosphates 144, 145, 149, 152

Lime and molybdate interactions in the nutrition of *Centrosema pubescens* and *Pueraria phaseoloides* 126, 129

Loss of Viability of Three Root Parasites in Infected Root Sections Buried in Soil 173

Macaranga spp. 88, 89

Machining and weight stresses, effect on sheet dimensions 41

Magnesium content, cover crops 128, 138, 188

Manganese content, cover crops 128, 137, 188

Manuring (*see* Fertilisers)

Mechanical scarification of seeds 101

Mechanical stability, effect of latex particle size 95

Melastoma malabathricum 91, 92

Mikania scandens 92

Molybdate and lime interactions in the nutrition of *Centrosema pubescens* and *Pueraria phaseoloides* 126, 129

Molybdenum content in leaf, stem and nodules 127, 135

Mooney viscoscity 60, 73, 86

Nephrolepsis biserrata 87, 88

Nephrolepsis sp. 90

Nitrogen :
- content
  - cover crops 128, 136
  - *Hevea* 149, 186
- fertilisers 178, 180, 181, 189

Nutrient deficiency 130, 139, 178

Nutrition of *Centrosema pubescens* and *Pueraria phaseoloides :* lime and molybdate interactions in 126

Old clones (*see also* Clones)
- bark thickness 18
- brown bast 13
- girth 7
- yield 24, 31

Panicum pilipes 88, 91

Panicum trigonum 91

Paper chromatography 168

Parentage of *Hevea* families, polyclonal and seedling origin 3

Particle size of latex :
- clonal latices 95
- effect of high speed mechanical agitation 96, 97
- „ „ nitrogen content 96, 98
- „ „ storage 94
- „ „ wintering 96

Paspalum conjugatum 90, 92

Passiflora foetida 88, 92

pH :
latex 69
soil 189

Phosphate *see* Fertilisers

Phosphorus content:
cover crops 128
Hevea 139, 186

Plant nutrients :
calcium 127, 149, 188
cover plants 126
Hevea 141, 178
magnesium 128, 149, 188
manganese 128, 188
molybdenum 126
nitrogen 127, 149, 178
phosphorus 128, 149, 178
potassium 128, 149, 178

Planting history, variety trials 5

Planting density 5, 179

Pot experiment using a latosolic, phosphate-deficient soil 139

Potassium :
content
cover crops 128
Hevea 143, 149, 186
fertilisers 180, 189

Preservation, short-term, of natural latex 65

Preservation *see* latex preservatives

Proteins of *Hevea brasiliensis* 155

Pueraria phaseoloides :
nutrient status 126
occurrence 88, 91
seed germination 99, 101

Recommended clones, 1955 20

Relative humidity and equilibrium water content 51

Relative humidity measurement for drying rates of sheet rubber 123, 125

Renewed bark, thickness 19, 188

Rhizobium 127

Rock phosphate and superphosphate as sources of phophorus for seedling rubber 139

Roots :
- cover crops 127
- parasites 173
- size, effects of phosphate 145

Scarification, chemical and mechanical for seed germination 99, 101

Seed Germination of some Tropical Legumes 99

Seed :
- germination
  - liquid immersion 99, 100
  - storage 99, 100
  - sulphuric acid scarification and hot water treatment 99, 104

Seedling families 2

Selector and weighing apparatus for the study of drying rates of sheet rubber 120

Serum :
- content in sheet rubber drying 46, 47
- in fresh latex 155

Sheet rubber drying, a survey of the factors involved in an experimental study 38

Sheet rubber :
- apparatus for the study of drying rates 119
- blister formation 57
- effect of drying conditions on rate of drying 43
- effect of drying conditions on technological properties 60
- factors affecting sheet dimensions 39
- relative humidity and water content 51
- serum content 39, 46
- smoked 65
- temperature 54, 123, 125

Short-term preservation of natural latex 65

Silica gel and alumina vacuum drying 54

Smilax sp. 89

Smoked sheet :
- from latex collected under wintering conditions 82, 83
- from latex preserved for twenty-four hours 72
- from latex preserved until 6 p.m. on day of tapping 69
- technical properties 72, 73

Smythea macrocarpa 89
Soap titration for estimating particle size in latex 93
Sodium benzoate in latex preservation 67
Sodium carbonate in latex preservation 66
Sodium citrate in latex preservation 67
Sodium metabisulphite in smoked sheet preparation 71
Sodium metabisulphite and flocculation of the yellow fraction 72
Sodium metasulphite in latex preservation 67, 76
Sodium molybdate, in plant nutrient experiments 126
Sodium phosphate in latex preservation 66
Sodium silicate in latex preservation 67
Sodium sulphite in smoked sheet preparation 71
Sodium sulphite in latex preservation 67
Soil :
analysis 127, 132, 187, 188
inland and coastal 10, 11, 19, 29, 34
Kedah series 139, 179
Malacca series 126
Rengam series 126
sandy latosol 178
Selangor series 126
Serdang series 126, 179
Spray reagents 169
Soluble proteins of 'bottom fraction' 155
Sulphuric acid scarification of seeds 99
Superphosphate and rock phosphate as sources of phosphorus for seedling rubber 139
Syneresis 44

Taenitis blechnoides 90, 91
Tapping system :
and brown bast 13, 17
in fertiliser experiment 179
Temperature, in sheet rubber drying 45, 123, 125
The Proteins of Hevea brasiliensis Latex. Part 3. The Soluble Proteins of 'Bottom Fraction' 155
The Response of Hevea to Fertilisers on a Sandy Latosol 178

The Short-Term Preservation of Natural Latex 65
The Soap Titration Method of Estimating the Particle Size of Hevea Latex 93
Thickness, temperature and humidity 61
Tinomiscium sp. 89
Transportation of latex, effect of 71
Trema orientalis 88
Trema sp. 90
Trials of *Hevea* varieties 1,6
Tropical legumes, seed germination of 99

Vegetation of Rubber Plantations 87
Vegetation species found in botanical surveys of R.R.I. Experiment Station 89, 90, 91
Virgin bark, thickness 17, 19, 188
Vitis trifolia 88
Vulcanised rubber 62

Water absorption in sheet drying 54, 56
Water content and sheet rubber drying 48, 49
Water loss in sheet rubber drying 41, 42
Williams Plasticity 61
Williams Recovery 62

Yield :
- and girth on inland and coastal soils 30
- coastal estates 34
- clonal seedlings 25, 26
- comparison of selected material 31
- comparison on inland and coastal soils 29
- effect of fertilisers 183
- inland estates 34
- old clones 24
- RRIM 500 series 27, 28, 32
- stimulation 166
- varietal trials 20

Zinc sulphate in latex preservation 67
